# Our Visualizations

Visualizations: Keep Austin Safe

# Self Critique

- What did we do well?
  - Splash page
  - Concept of our site
- What did we learn?
  - Collaborating as a team online
  - AWS, Docker, Postman, etc.
  - Start early!
- What did we teach each other?
  - Importance of communication
  - Being adaptable when plans change (COVID-19)
  - Keeping each other on track

# Self Critique (cont.)

- What can we do better?
  - Distribute the workload
  - Manage time efficiently
- What effect did the CATME peer reviews have?
  - They allowed us to be honest with each other and provide feedback
- What puzzles us?
  - Mocha Testing

# Other Critique

- What did they do well?
  - Their icon was really nice
  - The website could be very useful
- How effective was their RESTful API?
  - Overall nice and very practical
  - Many types of queries
- How well did they implement your user stories?
  - They implemented everything well and had great communication

# Other Critique (cont.)

- What did we learn from their website?
  - Safety tips about Austin and who to call for what
- What can they do better?
  - The search feature could use some refinement
- What puzzles us about their website?
  - The “Traffic Accidents” tab takes a long time to load in the instances
  - The alignments of the top bar are off
  - The layout of their pages are a bit confusing
